

Sam Trouy

trouys16@gmail.com · Chattanooga, TN · [LinkedIn](#) · [GitHub](#)

Product-minded full-stack engineer with five years of founding-team experience building and launching SaaS products. Owns work end-to-end across product discovery, backend architecture, interactive frontend development, and production operations.

EXPERIENCE

Founding Software Engineer

Apr 2021–June 2026

SheetRocks, Inc.

Remote

- Owned core product features end-to-end from customer discovery and scoping through REST API design (Go), interactive frontend development (React/TypeScript), and launch.
- Built data-intensive spreadsheet functionality supporting millions of rows, extending the Go calculation engine with sorting, formula range selection, and cross-sheet references.
- Conducted weekly user interviews and analyzed production usage to drive product priorities and feature design.
- Designed concurrent Go calculation endpoints that improved spreadsheet performance by over 500%.
- Owned AWS EC2 deployments and production reliability, including on-call debugging with CloudWatch logs and usage metrics.

GTM Engineer (Fractional)

July 2026–Present

JJS Group

Remote

- Build AI-assisted systems with LangGraph and LangChain to surface technical hiring signals, structure account and contact research, and support opportunity assessment.
- Automate discovery and research while keeping contact decisions and external outreach human-reviewed and manually sent.
- Work directly on technical business development, drawing on founding engineer experience to understand engineering roles and hiring situations.

LANGUAGES AND TECHNOLOGIES

- **Languages:** Go, JavaScript, TypeScript, Ruby
- **Technologies:** React, Node.js, Ruby on Rails, MongoDB, PostgreSQL, Redis, AWS, Docker, Git

OPEN SOURCE

Open Source Contributor

June 2026–Present

Zed code editor

Remote

- Fixed agent editor layout alignment in the Rust codebase ([PR #59735](#)).
- Added support for Unicode non-breaking characters with regression tests ([PR #59775](#)).
